

POSITION: Chemist

POSITION DESCRIPTION: Responsible for the expression and purification of recombinant enzymes. Optimize the purification conditions for the cytosolic enzyme, Ngly1, for use in enzyme replacement therapy. Execute multiple analyses using a variety of chemical equipment and biochemical assays. Verify the expression, purity and activity of enzymes. Collect data and interpret results.

EDUCATION REQUIREMENTS: Master's Degree in Chemistry.

EXPERIENCE: Three years of experience as a Chemist or Chemical Analyst.

SPECIAL SKILLS: Requires three years of experience with quantitative analytic chemistry techniques used in consumer-grade cosmetic materials (Liebig condenser, titrimetric determinations, and spectroscopy), pH meters, samplings, bacteria tests, and other measuring devices typically used in cosmetics, UV/VIS, and particle size distribution meter. Requires one year of experience with testing pharmaceutical materials, FT-IR, viscometer, TOC analyzer, and potentiometric titrator.

LOCATION: San Carlos, CA
